THE WORLD HASH DIRECTORY

13th Edition
published by

World Interhash 2008 Perth, Western Australia

Compiled by D2HD
(ably assisted by various regional helpers)

Designed and edited by HONKERS

FOREWORD

The details of hashes listed in this World Hash Directory have been provided by the network of regional hash websites who voluntarily publish details about hashing for various areas that cover the entire world. Hash regions are loosely defined and not necessarily based on national groupings. The information published in this World Hash Directory is NOT available in any consolidated world hash database supposedly available on the internet.

If you are looking for up-to-date hash information first check the appropriate regional hash website. The summary of regional hash websites is available in this World Hash Directory. Any variations to this list of regional hash websites will be reflected on a mirror list maintained on Hash Heritage Foundation website – www.thehashhouse.org. Regional hash websites are maintained by hasher volunteers who hash in the region and they are a great source of local hash information with many including details of local events.

This World Hash Directory publishes only basic information about each hash that runs regularly at least once a month. Information offered covers detail of when the hash operates, along with sufficient contact detail so intending visitors can establish precisely where. Despite the huge effort to update all information prior to publication, some of the hash listings are out of date. The “date last updated” provided for each entry gives some indication of the reliability of the individual listing. Help regional hash websites to update by forwarding any amendments directly to appropriate regional hash website.

The last line of each hash listing is the detail of “when founded”, “who founded” and “where founder from” that has been largely extracted from Hash Heritage Foundation files where details of who assisted the founder may also be available. The Hash Heritage Foundation website www.thehashhouse.org is where the Hash Genealogy is being continually researched. Make sure the records of your hash are complete by providing any missing critical information to genealogist@thehashhouse.org.

The regional hash website approach has proved to be highly effective and well suited to the informal nature of Hash House Harriers. Providing a consolidated World Hash Directory at each Interhash provides just a snapshot of hashing and motivates hashers around the world to provide updates and verification for inclusion by a deadline. The World Hash Directory becomes a valuable reference when access to the internet is not available. Search engines such as Google offer volumes of websites on hashing but so much of it is useless as many of the websites have not been updated for many years and are not likely to ever be. The internet references within World Hash Directory will be the most current as they have been reviewed as part of the general update process.

Thanks to the many hashers from around the world who provided updates of hashes to regional hash websites before the deadline. Thanks to Honkers who transformed the basic hash listings into a structured publication, Thanks to all the regional hash website editors who packaged the information up into suitable formats so it could easily be processed. Regional website editors include Slumpy, Mr Peeeenut, Ra, Room Boy, Flashman, JR, Hazukashii, Liz Tan, Proposition, Peter T Piper, Peeking Ong, D2HD, Bushbasher, Spinning Dwarf, Prof, Baldrick, W.E.N.D.Y. and Deep Throat.

On! On!

The original Hash House in 1938.

The planned New Hash House.

PRESERVING THE HASH'S HERITAGE

The Hash Heritage Foundation is working to preserve Hash heritage by rebuilding the Hash House in Kuala Lumpur and assembling the widest collection of archives and memorabilia.

The rebuilt Hash House will be for the use of Hashers worldwide. The Malaysian Government has designated 1 acre (about 0.4 hectares) of prime land for the new Hash House, a Development Order has been approved and architects are presently preparing detailed building plans, including internal fittings and furnishings.

Visit the website – www.thehashhouse.org – and:

- Become part of Hash history and assist financially by becoming a member of the Foundation.
- Check out the Virtual Hash Museum.
- Check out your Hash's Genealogy.

The original Hash House in 1938.

The planned New Hash House.

Progress report on rebuilding the Hash House

By Joe Doraisamy,

Chairman 1998 Kuala Lumpur Interhash Committee

In 1998, having donated RM250,000 to 10 charities, the 1998 Interhash Committee decided to donate the balance of RM185,000 (US\$60,000) towards the formation of a foundation charged with the principle task of rebuilding The Hash House for the use by people and Hashers worldwide. The original Hash House in Kuala Lumpur, in which Hashing was founded in 1938, was demolished in the 1960s.

In the year 2000, the Hash Heritage Foundation (or Yayasan Hash Heritage in the Malaysian national language) was established and managed by a seven-member Board of Trustees. The formation of the foundation, unlike in many other countries, was a fairly complicated process and it took a lot of effort and time to complete the exercise.

Land is a prerequisite for the rebuilding exercise and the Board then focused its attention on site selection and land acquisition from the Malaysian Government (the price of commercial land in KL was and is beyond its reach). It was a monumental task and I know very well, having been a senior government officer for many years, of the complexities of land acquisition. The strenuous efforts of the Chairman of HHF, Fu Chee Cheng, and the Board, produced results and the authorities allocated one acre of prime land to the Foundation in 2005. The success gave a tremendous boost to the morale of the Board.

The Board concentrated its attention, for the next two years, on land survey, design and obtaining the necessary approvals from KL City Hall. The Board then established a Management Committee of 14 members, charged with the responsibility of completing The Hash House. The task now, for the Board and the Management Committee, is to raise funds to complete the rebuilding of The Hash House.

In summary, after 10 years, these volunteers have remained enthusiastic and the Board largely intact. There is RM145,000 still remaining from the original RM185,000 mainly because none of the volunteers has charged the Board for their expenses. Foundation expenses were mainly for administration, taxes, professional fees and acquisition charges. As Chairman of the KL 1998 Interhash Committee, I am happy that the money donated to HHF is being put to good use.

The final task for the resurrection of The Hash House is to raise the necessary rebuilding funds. I would like to urge all hashers to participate in the rebuilding of OUR HOUSE, by becoming a member of The Hash House and all Hash chapters by becoming Hash House Partners. Log on to www.thehashhouse.org for details.

The original Hash House in 1938.

The planned New Hash House.

PRESERVING THE HASH'S HERITAGE

The Hash Heritage Foundation is working to preserve Hash heritage by rebuilding the Hash House in Kuala Lumpur and assembling the widest collection of archives and memorabilia.

The rebuilt Hash House will be for the use of Hashers worldwide. The Malaysian Government has designated 1 acre (about 0.4 hectares) of prime land for the new Hash House, a Development Order has been approved and architects are presently preparing detailed building plans, including internal fittings and furnishings.

Visit the website – www.thehashhouse.org – and:

- Become part of Hash history and assist financially by becoming a member of the Foundation.
- Check out the Virtual Hash Museum.
- Check out your Hash's Genealogy.
